Geologist

A competent geologist with four years work experience developed in the fields of construction and the oil and gas industries. Being an effective communicator, I liaise with team members with ease being able to delegate efficiently whilst working well with others. I am passionate about geology which enables me to stay motivated in all aspects of this discipline. I possess a can do attitude meaning that I face challenges head on and I am always eager to learn new ideas and concepts. Having a flexible approach to work, means that I flourish under pressure and can pull a team together successfully. I started my career in Spain and I am keen to travel for employment, having moved to England to develop my skills set further and continue to improve my English.
